

Aegify Risk Manager™

THE NEED

Your healthcare organization depends on effective management of corporate risk. Open IT security vulnerabilities and non-compliance with mandatory regulations reduce organizational value.

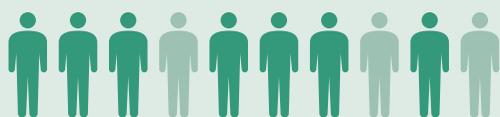

Risk management standard operating procedures are labor intensive and require constant monitoring. Legacy tools are complex, siloed and expensive.

There is a better way. With Aegify Risk Manager, you will reduce your risk exposure by protecting critical assets and ensuring security and regulatory compliance.

Effective, Scalable Risk Management:

- Risk assessment and monitoring
- Security risk assessment
- Compliance risk assessment
- BA risk assessment
- Risk profiling

TROUBLING FACT

HIGH RISK

68%

Healthcare Organizations have experienced a cyber attack

Are you part of the 68%?

FIGHT BACK

With Aegify Risk Manager, you'll easily:

- Identify critical assets, people and processes within your organization
- Diagnose your risk vulnerabilities, threats, likelihood and potential impact
- Receive easy instructions to cure existing exposure and liabilities
- Prevent future threats with Aegify's AlwaysOn™ risk monitoring tools

THE PROCESS

Diagnose

Within hours, you will be able to:

- Automatically discover and identify critical assets. Add tags to assets such as HIPAA, HITECH, PCI DSS, etc
- Automate the diagnosis and assessment process through a built-in knowledge base of asset types, threats, vulnerabilities, controls and risk scenarios.
- Add controls and vulnerability threat combinations
- Assess total organizational risk

Cure

Follow Aegify instructions to:

- Prioritize remedial actions
- Close your security and compliance gaps for HIPAA and other regulations
- Track asset owner actions
- Apply a sensitivity analysis to focus on critical controls assets or risky scenarios
- Monitor your risk score as it decreases

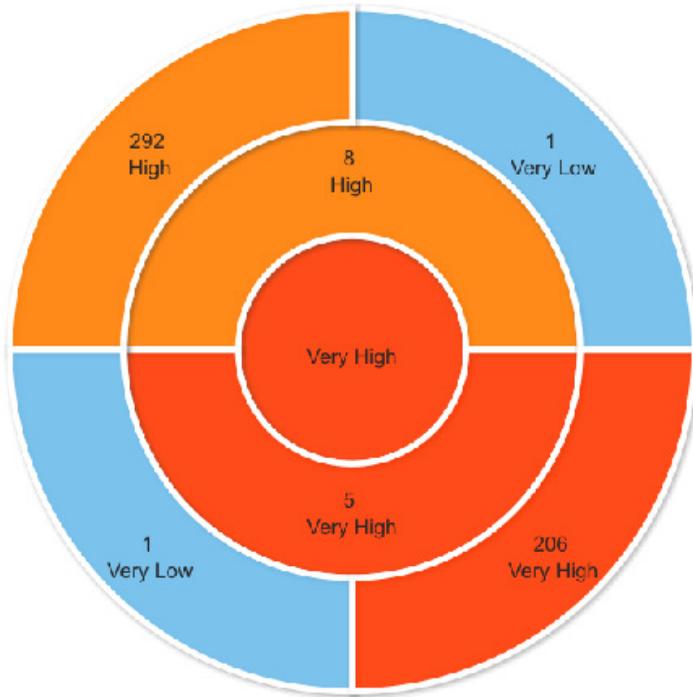

Protect

24/7 monitoring program will:

- Simulate risk scenarios and view security posture at different risk settings
- Minimize your organizational risk... today and tomorrow

CISOs and other security professionals: Experience peace of mind at an affordable price. It's time for Aegify Risk Manager.

AEGIFY RISK MANAGER: KEY DIFFERENTIATORS

- Features the world's first cloud-based service that provides real-time continuous monitoring of risk, security, and compliance status.
- Helps you automate risk management leveraging best-practice inputs from NIST, ISO, and OCTAVE standards.
- Allows you to define the asset-based risk factors and their relationships including threat, vulnerability, impact, likelihood and predisposing condition.
- Significantly minimizes your risk through automated vulnerability scans
 - 32,000 vulnerabilities
 - 92,000 checks across your network
- Easily integrates with Aegify Security Manager, Aegify Compliance Manager and Aegify BA Manager.
- Helps you quickly generate extensive risk reports based on risk filters.
