# Aegify Security Manager ™

THE NEED

It takes attackers just minutes and sometimes only seconds to steal data. It can take weeks and even months for a business to discover a breach. The risk is scary and surprisingly preventable.

In 2014, 30 million healthcare records were breached. Through the first eight months of 2015, this number has risen to 100 million ... so far. The average cost per healthcare security breach is between $1.7 and $5.5 million. For large companies like Anthem Blue Cross and Premera Blue Cross the liability is many times greater.

Effective, Scalable Vulnerability Management:

- **Asset discovery**
- **Vulnerability analysis and inventory**
- **Risk profiling and management**
- **Threat impact analysis**
- **Snapshot knowledge via intuitive dashboards and reports**
- **Remediation management**

PREVENT

$5.5

Million per incident on average (2015)

80%

Vulnerabilities are known. 97% of these were preventable and easily fixable.

FIGHT BACK

With Aegify Security Manager, you'll easily:

- Diagnose your security vulnerabilities
- Receive easy instructions to cure existing problems
- Manage organizational risk
- Prevent future threats with Aegify's AlwaysOn™ monitoring tools

THE PROCESS

1

Diagnose

Risk exposure and impact analysis:

- Detect exploitable software and hardware vulnerabilities
- 35,000 vulnerabilities/ 92,000 checks
- Automatically discover and scan any IT asset, inside or outside your network
- Automated mapping of vulnerabilities to regulations

2

Cure

Maximize ROI:

- Prioritize critical high risk vulnerabilities
- Enact control recommendations to minimize risk for HIPAA and other regulations with specific actions, activities and scenarios
- Prioritized remediation with time estimates

3
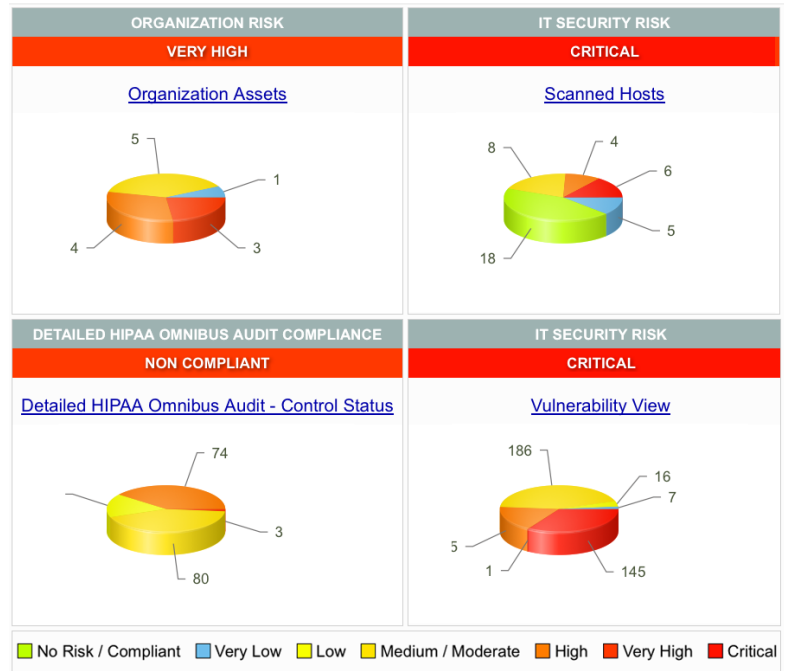

Protect

Against future vulnerabilities:

- Simulate similar risk scenarios
- Real-time, 24/7 monitoring
- Constantly updated for NIST database changes

CISOs and other security professionals: Experience peace of mind at an affordable price. It's time for Aegify Security Manager.

AEGIFY SECURITY MANAGER: KEY DIFFERENTIATORS

- Standalone security management or seamless integration with the Aegify RSC Suite.
- Security scans for more than 35,000 vulnerabilities and nearly 100,000 checks across your networks.
- Auto-discover and scan any IT assets inside or outside the company premises.
- Complete automation with real-time continuous monitoring of IT assets in organization: assessments, gap analysis and remediation.
- Automated mapping of vulnerabilities to control frameworks.
- Big data analytics and machine learning for better organizational security.
- Cloud based remote deployment and admin- istration from a single administrative console.
- Pay-As-You-Go deployment options are available.
- Significantly lower costs of ownership with positive ROI within months, not years, of use.
- Eliminates the need for multiple fragmented solutions for effective RSC management.
- Robust and scalable. Aegify's software-based platform can

ORGANIZATION RISK	IT SECURITY RISK
VERY HIGH	CRITICAL
Organization Assets	Scanned Hosts
5 / 1 / 4 / 3	8 / 4 / 6 / 18 / 5
DETAILED HIPAA OMNIBUS AUDIT COMPLIANCE	IT SECURITY RISK
NON COMPLIANT	CRITICAL
Detailed HIPAA Omnibus Audit - Control Status	Vulnerability View
74 / 3 / 80	186 / 16 / 7 / 5 / 1 / 145

☐ No Risk / Compliant ☐ Very Low ☐ Low ☐ Medium / Moderate ☐ High ☐ Very High ☐ Critical

scale from medium-sized single site organizations to large hospital IDNs with complex network enterprises.
